University of California, Berkeley

B.A. Computer Science Graduating Dec 2018

Languages: Python, Java, C#, TypeScript, JavaScript

Technologies: AWS, MongoDB, ¡Query, Express, Photoshop,

Figma, Node.js

InnoWorks Executive Director

Organized and hosted a five day STEM program for underprivileged Bay Area middle school students.

[Mlovement

Captain

Directed and choreographed a 6 minute set for thirty dancers.

Computer Science Mentors

Data Struct. & Algo. Mentor Mentored undergrads in study strategies, class scheduling, and career building.

coursework

- Intro to Artificial Intelligence
- UI Design and Development
- Efficient Algorithms
- Intractable Problems
- OS and Systems Programming
- Computer Architecture
- Discrete Math and Probability
- Linear Algebra and DE's

پ work

P.I.N.G. Inc.

Summer 2017

Software Engineer Intern

- Implemented a scalable web server app that accomodates 10,000 emails per day and timekeeps through Exchange Web Service stream data.
- Researched test server options such as AWS, rackspace, and Azure, settling on **Azure** for Exchange compatibility
- Ported Web Application from .NET to Node due to 3rd party platform incompatibility

Computer Science 61B

Fall 2016 - Spring 2017

Lab Assistant

Taught data structures, sort algorithms, and graph algorithms to 75+ undergrads

Alexa Skill Tone Analyzer Python, AWS, DynamoDB

- Created a journaling Alexa skill that stores entries along with its metadata and responds with an emotional analysis
- Integrated IBM Tone Analyzer API with Alexa

Recipe Assistant

HTML, ¡Query, AWS, DynamoDB, JavaScript

- Built dynamic front end of the web app
- Implemented user submissions and recipe display

Facebook Time Chrome Extension

JavaScript, ¡Query, HTML

- Kept track of time spent on facebook and individual profiles with DOM scraping
- Built extension UI and stored user data with chrome storage

Personal Website

HTML, CSS, JavaScript, jQuery, bulma

- Implemented and designed personal website with focus on responsive design
- Created some CSS from scratch before settling on bulma for flexibility and responsiveness
